

Integrated Color Management

4-day immersion into the theory and practice of color management from calibration to workflow.

Integrated Color Management

From cameras to monitors to printers, this comprehensive program will teach you how to create and apply profiles to build a variety of types of workflows. In a small classroom setting, this course is ideal for users who require more knowledge of color management, such as CMYK print production. It will start off with the basics then moves into more advanced coursework, so any background in color is welcome. The class, as an added bonus, includes color vision analysis and testing for X-Rite Color Management certification.

Who Should Attend?

This course is ideal for anyone specializing in Graphic Design, Prepress, Digital Print Production, Photo Labs, Sign Printing, Fine Art Reproduction, Technical Support (photographic and print users), or anyone who requires more color knowledge.

Course Overview

- Color theory
- Fundamentals of color management
- Overview of measurement instruments
- ICC color management topics such as GCR
- Hard and soft proofing
- RIP color management settings
- Preparing and preflighting files
- How to develop a color managed workflow
- Comparing data and averaging
- How to create custom profiles, from input to output
- Practice time is given to repeat demos and answer other workflow problems

Benefits of Learning from X-Rite

- Taught by an X-Rite Color Expert in a small classroom setting of six students or less, you are guaranteed to receive individualized attention.
- You will work at your own fully equipped workstation with the latest X-Rite hardware and software.
- Our professional training classroom offers a variety of large format printers from many manufactures, enabling you to learn by working hands on in a workflow similar to your own.
- You will immediately apply this knowledge by building and using profiles to create an entirely color-managed workflow.
- To help you implement what you've learned, you will receive our full-color workbook, including a variety of "Need to Know" technical documents.
- Take the Farnsworth-Munsell 100 Hue vision test at no additional charge.
- Testing will be done for an X-Rite Color Management certification.

Course Length: 4 Days

Location: X-Rite

Pricing: \$1,895 per person
