i1 Photographer Kit

The i1 Photographer Kit is a convenient bundle of two essential color tools to achieve fast, efficient color accuracy and control for any photo production. It was created for discerning photographers looking for the highest level of on-screen color accuracy coupled with the ability to quickly and easily gain color control and consistency from capture to edit.

i1 Photographer Kit consists of:

• **i1Display Pro** calibration device and software offers the perfect combination of unrivaled color precision, speed and control for the highest level of on-screen color accuracy, including mobile devices and projectors.

• **ColorChecker Passport Photo**, a convenient pocket-sized tool for any photographer looking for more accurate, consistent color and creative flexibility.

Combining two essential color management tools in this handy kit offers photographers the convenience of a single purchase at a lower price than if purchased individually. Speed up your photo production workflow and get to your creative look faster than ever before!

For photographers who demand speed, options and flexibility, this kit features:

i1Display Pro

i1Display Pro is the industry-recognized professional display calibration system with unrivaled color accuracy on all modern display technologies including LED, Plasma, RG Phosphor, OLED & Wide Gamut:

• Blazing fast measurement speed in an intuitive all-in-one design also adopted by leading display manufacturers as preferred color management device
• Multiple Display and Workgroup Matching – re-use profile settings on multiple displays connected to the same computer or to multiple computers within a workgroup
• Broadcast video standards support – NTSC, PAL SECAM, and Rec. 709, Rec. 2020 and DCI-P3
• Profile optimization, display trending, display uniformity testing, and more
• EXCLUSIVE X-RITE TECHNOLOGY! Mobile Friendly - Compatible with X-Rite ColorTRUE mobile app for calibrating Apple iOS and Android mobile devices

ColorChecker Passport Photo

ColorChecker Passport Photo is the next evolution of the original 24-patch Macbeth ColorChecker, now celebrating 40 years as an industry standard.

• Combines 3 photographic targets in one durable, protective case: white balance target, 24 patch classic target, and enhancement target
• Creates professional, custom camera profiles in minutes using the industry standard 24 patch Classic target and included software (including Lightroom plug-in).
• EXCLUSIVE X-RITE TECHNOLOGY! Dual Illuminant profile creation - takes into account two different light sources to create a single profile which can be applied to a variety of lighting conditions
• Use Creative Enhancement target to quickly check and evaluate shadow details or highlight clipping; understand and control color shifting or neutralize and create a look with one click.
• Capturing a consistent white point in a set of images allows for adjustments to different lighting conditions and helps eliminate color casting
• Includes Lanyard
