Video Color Tools For Every Gear Bag

X-Rite video tools are a must-have for filmmaking professionals looking for the best color tools to speed up their workflow, from pre-production through post, while maintaining consistency and accuracy.

IDEAL COLOR BALANCE AND CONTROL FOR VIDEO - from Capture to Editing.

Time Saving Color Management Solutions for Filmmakers. **SHOOT FOR IDEAL.**

ColorChecker Tools For Filmmakers

Whether you are trying to match multiple cameras, set perfect exposure or achieve accurate color-correction, ColorChecker Video targets save you time from pre-production through post, allowing you to get to your creative look faster.

COLORCHECKER PASSPORT VIDEO

ColorChecker Passport Video combines four video production targets – Color Chips, Grayscale, White Balance and Focus – in one pocket-sized protective case giving you the ultimate in functionality and portability. This essential color tool will enable you to get a better camera-to-camera match, set perfect exposure and easily edit for mixed lighting. You'll reduce editing time with accurate color correction and get to your creative look faster.

COLORCHECKER VIDEO

ColorChecker Video is a two-sided, standard-size target that provides color, skin and gray color chip references on one side and a spectrally neutral white balance reference on the other side. It will get you to a worry-free color balanced place, a consistently neutral place and an ideally exposed place faster than ever before – saving you valuable time from capture to edit. It's an essential color tool you won't want to be without.

COLORCHECKER VIDEO XL

ColorChecker Video XL is designed for those longer and wider shots when you need a larger reference target. Twice as large as our standard-size ColorChecker Video, It will speed up your color correction process and save you hours in post. Use it to nail exposure, match multiple cameras and maintain consistency during changing light. Ideal for use on a large set, a larger venue, or when capturing aerial shots.
